

## **Gerard van den Berg**

Project Manager at KWR Water Research Institute and Coordinator of ULTIMATE Project

Gerard has a PhD in Geochemistry from Utrecht University in the Netherlands. At KWR he is team leader and Project Manager. The Innovation & Valorisation team plays a central role in realizing innovations, and in creating social and economic impact. As team leader, he heads up a group of professionals and experts who are responsible for shaping and managing KWR's national and international research programs. As project coordinator and project manager, he is involved in initiating, implementing and supervising challenging international collaboration projects that contribute to the expertise and ambition of KWR as leading water research institute. He is currently Coordinator of ULTIMATE, a EU funded project focusing on water smart industrial symbiosis. As project manager of Watershare, Gerard is involved in a unique network that aims to bring together leading knowledge institutes and ambitious end-users in the water sector, for purposes of knowledge sharing and the joint conduct of future-oriented projects.
